

MUHAMMAD AIMAN

SOFTWARE DEVELOPER

+60179535676 Putrajaya aimanasrn@gmail.com https://aimanasrn.pages.dev/

PROFESSIONAL SUMMARY

Software Developer with over five years of experience in mission-critical government systems, frontend applications, payment platforms and full-stack development. Experienced in C, SQL, DB2, CICS, React, Next.js, Angular, Node.js and PostgreSQL. Skilled in production support, data migration, API integration and building maintainable business applications.

TECHNICAL SKILLS

Frontend	React.js, Next.js, Angular, Vue.js, TypeScript, Tailwind CSS
Backend	Node.js, Express.js, PHP, Laravel, C
Database	PostgreSQL, MySQL, DB2, Supabase
Enterprise	CICS, data migration, production support, SLA delivery
AI-Assisted Development	ChatGPT, OpenAI API, GitHub Copilot, Gemini, Claude, prompt engineering, AI-assisted system development, code generation, debugging, documentation, UI prototyping, and workflow automation
Tools	Git, GitHub, Docker, Vercel, DigitalOcean, Cloudflare, Playwright

PROFESSIONAL EXPERIENCE

INFOMINA BERHAD <i>Backend Developer (Mainframe Backend Developer)</i>	<i>May 2024 - Present</i>
- Develop and maintain mainframe backend programs using C and SQL to support large-scale data migration, data processing, and system enhancements. - Deliver system changes within agreed SLA requirements while maintaining the reliability and stability of mission-critical government systems. - Provide technical support and user training for the CICS environment, improving operational knowledge among JPN personnel. - Collaborate with INFOMINA teams and government stakeholders to support seamless system integration, deployment, troubleshooting, and performance. - Analyse technical requirements, resolve backend issues, and implement system improvements based on operational and business needs.	
FOTIA SOLUTIONS SDN. BHD. <i>Frontend Developer</i>	<i>Aug 2023 - Apr 2024</i>
- Developed and maintained responsive frontend modules using Angular for a government security screening application. - Contributed to E-Vetting 3.0, an online vetting system designed to support the security screening of civil servants and individuals working with government agencies. - Integrated RESTful APIs to enable secure data retrieval and submission between frontend and backend systems. - Collaborated with backend developers and project stakeholders to deliver features aligned with government security, compliance, and operational requirements. - Improved frontend performance, usability, and responsiveness to support mission-critical screening processes.	

TOYYIBPAY SDN. BHD.
Full Stack Developer

Feb 2023 - Jul 2023

- Developed and maintained full-stack web applications using Vue.js and React.js for frontend development and Node.js for backend services.
- Contributed to ToyyibGold, an e-commerce platform for online gold trading, supporting secure and efficient digital transactions.
- Developed features for an essential-goods delivery platform similar to GrabFood, enabling users to order groceries and household items.
- Built and integrated RESTful APIs and third-party services to support payment, transaction, and application workflows.
- Optimized database queries and backend processes to improve application performance, reliability, and scalability.
- Collaborated with cross-functional teams in an Agile environment through sprint planning, code reviews, testing, and production deployments.

HEITECH PADU BERHAD
Backend Developer (Mainframe Backend Developer)

Feb 2021- Oct 2022

- Developed and maintained mainframe backend applications using C and SQL, supporting data processing, system enhancements, and migration activities.
- Designed and executed data migration programs to transfer legacy records accurately and securely into updated systems.
- Delivered system enhancements, bug fixes, and change requests within agreed timelines and SLA requirements.
- Provided technical support and end-user training to JPN personnel on the CICS environment, improving operational familiarity and system usage.
- Collaborated with developers, technical teams, and government stakeholders to support smooth system integration, deployment, and production performance.

EDUCATION

Bachelor of Computer Science (Honours)
Universiti Malaysia Terengganu, Malaysia | Graduation Year : 2020

LANGUAGES

Bahasa Melayu : Native
English : Professional Working Proficiency
