# Muhammad Aiman.

**Software Developer** · Full-stack & Enterprise Systems

+60 17-953 5676 | aimanasrn@gmail.com | aimanasrndev.pages.dev | github.com/aimanasrn | LinkedIn
Putrajaya, Malaysia

## PROFILE

Software developer with **5+ years** of experience across **government systems, fintech and independent products**. Combines mainframe backend expertise (C, SQL, DB2, CICS) for mission-critical JPN systems with modern full-stack development in React, Next.js, Angular, Laravel and Node.js. Turns business requirements into reliable, user-friendly software, using AI-assisted development with human-reviewed, tested code.

## EXPERIENCE

### Mainframe Backend Developer
May 2024 – Present

**Infomina Berhad** · Jabatan Pendaftaran Negara (JPN) project

- Develop and maintain **backend programs in C and SQL** for large-scale data migration, data processing and system enhancements.
- Deliver production enhancements **within agreed SLAs**, safeguarding the stability of mission-critical national registration systems.
- Support delivery coordination with government stakeholders, and provide CICS support and **user training** for JPN personnel.

### Frontend Developer
Aug 2023 – Apr 2024

**Fotia Solutions Sdn. Bhd.** · E-Vetting 3.0, Chief Government Security Office (CGSO)

- Built responsive **Angular** interfaces for E-Vetting 3.0, the online security-screening system for civil servants and government agency personnel.
- Integrated **RESTful APIs** for secure data exchange and improved performance and usability in line with government security requirements.

### Full-Stack Developer
Feb 2023 – Jul 2023

**ToyyibPay Sdn. Bhd.** · Fintech & e-commerce

- Built features across **web and mobile** for ToyyibGold, an online gold-trading platform, and an essential-goods delivery platform.
- Integrated **payment, transaction and third-party APIs** and optimised backend queries, working in an **Agile** team with code reviews and production deployments.

### Mainframe Backend Developer
Feb 2021 – Oct 2022

**HeiTech Padu Berhad** · Government systems (JPN)

- Developed and maintained **C and SQL backend applications**; designed **data migration programs** moving legacy records accurately and securely.
- Delivered enhancements and fixes under SLA; trained JPN personnel on CICS.

## SELECTED PRODUCTS

**DidikFlow** — EDUCATION SAAS
Central workspace for tuition centres to manage students, classes, invoices and QR attendance.
Next.js · TypeScript · Tailwind CSS · Supabase PostgreSQL

**Nova Invoice** — INVOICING
Client management, business profiles and PDF invoice exports.
Laravel 11 · Inertia.js · React 19 · SQLite

**Suka Room & Homestay** — BOOKING
Bilingual booking platform with availability checks and enquiries.
React · TypeScript · Vite · Supabase

**SoftSpend** — FINANCE
Dashboard for everyday spending, budget progress and transactions.
React · Vite · Supabase

**KOPERAT · Al-Fahmu** — WEBSITES
Corporate property site and learning-centre site with enquiry flows.
React · Tailwind CSS · Vite

## SKILLS

**Frontend**
React · Next.js · TypeScript · JavaScript · Angular · Vue.js · Nuxt · React Native · Tailwind CSS

**Backend**
Node.js · Express.js · Laravel · PHP · Inertia.js · REST APIs · C · C#

**Database**
PostgreSQL · Supabase · MySQL · SQLite · DB2 · SQL

**Enterprise**
Mainframe · CICS · Data Migration · Production Support · SLA Delivery

**Testing & Tools**
Playwright · Vitest · Git / GitHub · Docker · Vercel · Cloudflare · DigitalOcean

**AI-Assisted Development**
Claude · OpenAI API · GitHub Copilot · ChatGPT · Gemini · Prompt Engineering

## EDUCATION

**Bachelor of Computer Science (Hons)**
Universiti Malaysia Terengganu · 2020

## LANGUAGES

**Bahasa Melayu** — Native
**English** — Professional
